

Professor Geoffrey Boulton OBE, FRS, FRSE, Regius Professor and Vice Principal of the University of Edinburgh.

Professor Boulton is a member of the Prime Minister's Council for Science and Technology, UK's top-level science and technology advisory body. He has chaired a number of its committees relating to policies for science, research and the economy. He chairs the Research Committee of the League of European Universities, the Royal Society's Energy Work Group and the Scottish Knowledge Transfer Committee. He is the General Secretary of the Royal Society of Edinburgh, Scotland's national academy, is a member of the Scottish Science Advisory Committee, the Council of the University of Heidelberg and the Council of the University of Iceland. Until recently he was a member of the Royal Commission on Environmental Pollution, and has been a member of Scottish Higher Education Funding Council and chairman of its Research Committee, the Councils of the Natural Environment Research Council and the Royal Society, and chaired the Royal Society Committee responsible for public exhibitions. His research is in the field of climatic and environmental change and energy. He leads the Global Change Research Group in the University of Edinburgh, the largest major research group in the University's School of Geosciences. He has received international and national prizes for his research, including the Lyell Medal of the Geological Society, the Kirk Bryan Medal of the Geological Society of America, the Seligman Crystal of the International Glaciological Society and the Science Medal of the Institute of Contemporary Scotland. He is an Honorary Fellow of the International Union for Quaternary Research, and has received honorary doctorates from Chalmers University, Sweden (DTechnol), Birmingham University and Keele University (DSc).
